

Dear Diabetes Clinician,

The Diabetes Technology Society and its Planning Committee, invite researchers, physicians and health care professionals from around the world, to attend the Sixth Annual Clinical Diabetes Technology Meeting to be held from April 9-10 at the Hyatt Regency San Antonio hotel in San Antonio, Texas.

The meeting will be practical and designed for busy diabetes clinicians who want to use the latest technologies and treatments in their practices and see demonstrations of the latest products. The faculty for this national meeting will include thought leaders in clinical endocrinology from throughout the United States. The field of diabetes technology has advanced rapidly over the past few years to produce powerful products for the monitoring and management of diabetes, and this meeting will present practical information about how to take advantage of these advances.

About 400 scientists, clinicians, industry leaders, and policy shapers from over 25 countries will attend this conference to hear the most renowned leaders in the diabetes field present cutting-edge research.

This year's Clinical Diabetes Technology Meeting will include topics on "Blood Glucose Monitoring," "Continuous Glucose Monitoring," "Hemoglobin A1c and Mean Blood Glucose," "Hospital Therapy," "Minimizing Glycemic Variability," "Avoiding Hypoglycemia," "Insulin Pens, Pumps, and Dosing Software for Insulin Delivery," "Medical Management of Type 2 Diabetes," "Technology to promote healthy eating," "Hazards of Fructose," "Foot Care Technology," "Telemedicine Management of Diabetes" and feature survey questions with instant tabulation of audience responses.

Foreign nationals from some countries must obtain a temporary travel visa (B-1) in order to attend this meeting. This is normally done through the US Embassy or Consulate in your host country. Detailed instructions on how to obtain a visa can be found online at the US Department of State Business Visa Center and the National Academies' International Visitors Office. To assist foreign visitors in obtaining visas, we have registered this conference with the US Department of State. You will need a copy of this letter, along with copies of the meeting registration and hotel reservation confirmation to help speed up the visa application and approval process. You can register for the hotel and conference through our website at: <http://www.clinicaldiabetestechology.org/index>. In addition to obtaining travel visas, all foreign attendees are fully responsible for the costs of meeting registration, travel, lodging, and related expenses associated with attending this meeting.

We look forward to seeing you in San Antonio and sharing information about projects of mutual interest.

Sincerely yours,

A handwritten signature in black ink that reads "David Klonoff". The signature is written in a cursive, flowing style.

David C. Klonoff, M.D.  
Chair, Clinical Diabetes Technology Meeting Planning Committee
